

## **Canine Movement and Performance How to Get the Most Out of Your Dog from a Veterinarian's and Professional Handler's Point of View**

Sunday, April 7, 2013 from 1:00 PM to 5:00 PM

**Dody Tyneway DVM CCRT CVA AVCA and Moira Cornell-Breeder/Handler/Trainer**

*Dr. Dody Tyneway holds a B.S. in Animal Science from Cornell University. She graduated with honors from the University of Florida College of Veterinary Medicine in 1992. Postgraduate studies include an internship in small animal medicine and surgery at the world renowned Animal Medical Center in New York City. She became certified in veterinary acupuncture through the International Veterinary Acupuncture Society, is a certified Tuina practitioner and has studied classical acupuncture and herbal medicine with Dr. Xie at the Chi Institute. Dr Tyneway is a veterinarian certified in animal chiropractic by the American Veterinary Chiropractic Association. She has studied veterinary homeopathy with Dr. Richard Pitcairn and is certified by the Canine Rehabilitation Institute as a Certified Canine Rehabilitation Therapist (CCRT).*

*Moira Cornell has been training and showing dogs for over 25 years. She started showing horses as a young girl and then she moved on to the wonderful world of competitive dog shows. These days, dogs take up the majority of our lives. Besides loving, owning, and showing dogs, she also makes her living by training and judging ASCA obedience. She has more than 150 students, whom she may see once a month to a few times a week. She has also been an active member of the Valley Hills Obedience Club for 20 years. She has earned more than 100 titles in a variety of highly competitive areas such as conformation, agility, obedience and flyball. She and her dogs have earned several High in Trail, Best of Breed and group placements.*

Whether you are in the breed ring or running an agility course, this seminar will teach you how to improve your dog's overall performance and decrease injuries.

Many "Reach" and "Drive" limitations can be resolved by lengthening and strengthening the muscles of the caudal shoulder and cranial hip to optimize movement. These muscles give dogs the ability to reach, drive and jump more efficiently.

### **Some of the topics covered in this unique seminar:**

- ❖ How Conformation affects Gait and Performance.
- ❖ How Orthopedic and Neurological Conditions affect Gait.
- ❖ Basic tips for spotting abnormal gait and lameness.
- ❖ Why is CORE strength important and how can we improve it?
- ❖ Techniques to improve reach and drive.
- ❖ Body Awareness and why it is important.
- ❖ Demonstration of exercises to improve body awareness and block work.
- ❖ Review Stretches and Some Core Strength Assessment.

**Space is limited! So register today!**

See details on next page.

**Registration Form**
